Purchasing

Mission

To obtain goods and services for public purposes in the most cost-effective manner possible and ensure that all procurements are made with care, integrity and conform to rules, regulations and ethical standards relating to purchasing activities. The program ensures that user agencies obtain goods and services in a cost-effective manner without sacrificing quality and standards. The program ensures public access to appropriate information by expanding the applications of the Rhode Island Vendor Information Program to enhance transparency. The program ensures the fullest participation of women and minority business enterprises in state-funded and directed construction programs and projects and state purchases of goods and services.

Description

The Purchasing program is composed of five major functions: procurement, operational support services, standards and specifications development and management and vendor information. Procurement solicits bids or requests for proposal and requests for quotes for services and supplies, supports price negotiations and implements affirmative action programs. Operational support services includes purchase order production and record keeping, bid preparation and opening, requisition tracking, and vendor files. Standards and Specifications works with agency representatives to develop statewide standard specifications for goods and services to be solicited. The Vendor Information Program is an electronic system for registering potential bidders and providing bid and other information to vendors and the general public. The Division continues to streamline operations by using legal counsel to standardize front end solicitation documents. This will provide greater uniformity for all users of the procurement process including the Division, agencies, architects and bidders. In addition, the utilization of the Lean process review for Request for Proposals will result in several efficiencies over the upcoming months.

Statutory History

The Purchasing program was established under R.I.G.L. 42-11-2. Operation of the state-purchasing program is set forth in R.I.G.L. 37-2. This section was established by public law in 1939 until its repeal in 1989, when House Bill 89-H-5000 Substitute A, as amended (known as the Lamb Legislation), an Act Relating to State Purchases, was enacted. This act established new language to institute legal mandates based on the Model Procurement Act published by the American Bar Association. The major thrust of the legislation was the creation of a framework for enhanced opportunities for competitive procurement and increased accountability for state officials through the centralization of purchasing functions for state agencies. R.I.G.L. 37-2-17.2 requires the institution of an electronic Vendor Information Program. In 2011, in accordance with RIGL 37-2-18(b) and the proposed Purchasing Regulations (Effective on or about 1/11/11), which provides that, beginning January 1, 2014, all bid proposals for public works projects are required to include a copy to be available for public inspection upon the opening of the bids. Any bid proposal that does not include a copy for public inspection shall be deemed to be non-responsive. R.I.G.L. 37-2-18(b) and (j).

General

Mission

To maintain a statewide accounting of all expenditures, which are not allocated to other state departments or agencies and not specific to any one program within the Department of Administration.

Description

The General program consists of funds appropriated to finance expenditures not allocated to other state departments or agencies and not specific to any one program within the Department of Administration. It should be noted that the Department's Rhode Island Capital Plan Fund appropriations are included under this program. Special legislative appropriations are initially the result of the passage of legislation which is not part of the annual appropriation act. Tort claims and court awards are paid pursuant to R.I.G.L. 9-31, which provides that the general assembly may make such appropriations as it shall deem proper in payment of or settlement of claims against the state, provided, however, that there is hereby appropriated any money in the treasury not otherwise appropriated a sum sufficient to pay claims against the state, settled pursuant to the provisions of the chapter and the state controller is hereby authorized and directed to draw his orders upon the general treasurer for the payment of said sums.

Statutory History

The existence of General has no statutory basis, but rather reflects a combination of appropriations which support various expenditures not allocated to other state agencies. The authority for payment of tort claims was enacted in 1970 and is described in R.I.G.L. 9-31.

Internal Service Programs

Mission

To provide the most cost-effective delivery of goods and services to other state programs.

Description

Various services needed by state-operated programs and activities are provided on a centralized basis. The costs of these operations are borne by the user agencies through a charge system that allocates the cost of delivery of the goods or services. The operational expenses of these programs are shown for display purposes only, since the costs to state agencies are reflected in the budget of the user agency both on an actual and budget basis. Internal service programs that are operated by the Department of Administration include telecommunications services, mail services, utility services, automotive services (repair and replacement), state employee health fund, other post-employment benefits (OPEB) and the assessed fringe benefit fund. The telecommunications office manages all voice grade telephone line installations, service changes and billing statewide, and provides direct services both internally to government and to the public. Central mail services provides for inter-agency mail delivery and processing of United States mail for most state agencies. Central utilities provides for the administration and fiscal management of electricity and gas services. State fleet provides for the administration and fiscal management of the state-owned vehicles, and operates several fuel depots throughout the state. The Assessed Fringe Benefit Fund provides funding for state employee workers' compensation, severance pay, unemployment pay and employee assistance programs. Funds are raised through an assessment on payroll expenses of all state departments and agencies. The State Employee Health Fund provides for the administration and distribution of active and retiree healthcare costs statewide. In FY 15 the Department moved the worksite wellness program and employee benefits contracts used for auditing, employee bid preparation, and employee bid review to this fund. A dedicated trust has been set up to fund the liability related to Other Post Employment Benefits (OPEB) on an actuarial basis. An example of OPEB benefits include retiree medical, dental, prescription, and other similar post employment benefits for retired employees and their dependants. In accordance with RIGL 36-12.1-5, the trust began operations in fiscal year 2011. In the FY 2018 revised budget, human resources, information technology, and facilities management transferred to internal service funds pursuant to the authorization by the General Assembly in the FY 2018 Appropriations Act.

Statutory History

The Director of Administration is authorized by R.I.G.L. 35-5 to establish a system of rotary or rotating funds in any state department or agency. R.I.G.L. 36-12.1-5 established the OPEB trust.
