Introduction

One of the most important policy functions of State Government is the development of the budget. The budget is the plan of operation describing how the state will use its financial resources to meet the needs of the public. This plan must include an estimate of all proposed expenditures and the means of financing them.

Five years ago, the State began a new way of doing business in Rhode Island, and that plan is beginning to show results for taxpayers. One of the most telling signs of progress has been in our economy, which today stands stronger than it has been for decades. Governor Raimondo plans to recommend a Fiscal Year 2021 budget that continues to make critical long-term investments in the future of Rhode Island. Ultimately, her proposal will:

- Continue to invest in programs that stimulate Rhode Island’s economy and create jobs;
- Boost the state’s talent pipeline through innovative workforce strategies;
- Take even greater strides toward improving education and giving all students – from our early learners to our college-bound kids – the tools and equal opportunities to succeed; and
- Make government work better and more efficiently for taxpayers.

Budget requests should emphasize this agenda. These investments will require further efficiency efforts. Agencies should consider:

- Eliminating duplicative and underperforming programs
- Streamlining and consolidating programs, offices and services.
- Reducing operating funds due to service efficiencies.
- Reducing layers of management and administration.

Budget System

The FY 2021 Budget will be the third budget developed in the new budget system known as Budget Formulation and Management (BFM). Separate instructions on using the system are available on the OMB/Budget Office website at www.omb.ri.gov. There may be additional updates to the BFM instructions if there are changes in BFM or new features of which we want agencies to be able to take advantage.

Budget Allocations

The first phase of the budget process involves the preparation and announcement of budget allocations, or targets, which are to be adhered to by each agency in the preparation of its upcoming budget. For the FY 2021 Budget, agencies must submit both a current services level (CSL) budget and a constrained budget based on a target funding level to be provided by the Budget Office. The current services level budget should be in line with current staffing and operations of the agency; in other words, the budget needed to continue operating at the same level as the FY 2020 enacted budget. This budget should be essentially in-line with the “FY 2021 target base” shown on the bottom of page 1 of your agency target sheet. Expansion of existing programs or requests for new programs should only be included in the agency’s FY 2021 budget submission if they are offset...
by decreases elsewhere in the agency budget. Agencies will have an opportunity to
discuss program expansions or new programs requiring new funding with the Governor’s
Office and OMB over the next few months.

In this year’s budget request, agencies will use decision packages within BFM to identify
specific areas of realignment of funds or reductions to meet the constrained budget target.
These decision packages will identify the constrained and CSL budgets. How decision
packages work is described in section 13 of the BFM instructions. The intent of requesting
two separate budgets is to provide the Governor an understanding of what it would cost to
continue operating state government at the current level and to provide options for reducing
spending to meet available resources. The statewide budget allocation targets formulated
by the Budget Office are based upon preliminary revenue estimates for the ensuing fiscal
year, and the desire to prioritize all activities and programs statewide. The Governor has a
constitutional mandate to submit a balanced budget to the General Assembly.

A significant feature of the allocation target process is that allocation targets are made at
the agency level, rather than at the individual program or sub-program level. The agency
Director is responsible for determining how these allocations will be distributed among the
agency’s programs in the agency budget request. This process encourages agency
managers to make program adjustments that shift resources from low to high priority
services.

The use of a funding target reinforces the role of agency managers in the assignment of
priorities among programs. Where the allocation requires a reduction or elimination of
programs, agency managers are given the opportunity to specify areas of reduction through
the decision package process.

FY 2020 Revised Budget
Forms for preparing the FY 2020 Revised Budget are located under the BFM tool bar
“Budget Formulation”

Agencies are expected to operate within the current year budget as enacted. Although there
may be a need to make some adjustments within programs and line items in the FY 2020
Revised Budget, the expectation is for the total general revenue budget for a given agency
to not change. Given recent legislative changes, the Budget Office expects to submit very
few supplemental revisions for the current fiscal year (refer to the revised OMB Budget
Adjustment Policy). However, special consideration should be given to any savings
proposals for FY 2021 that could be implemented in FY 2020 and thus produce savings in
the current fiscal year that could further help with the projected FY 2021 deficit. This would
primarily be initiatives that can be implemented without legislative approval.

Brief Outline of Budget Process
The expenditure targets to be used in developing your budget submission will be distributed
shortly after these instructions. Each agency is requested to submit certain items at varying
intervals during August and September, as outlined on the Timetable on page 6 and further
detailed in these instructions.
During the fall, the Budget Office will review agency budget requests for compliance with the Governor’s direction, technical accuracy and concurrence between agency proposals and the Governor’s policies and priorities. Agency proposals will need to be brought into balance with the revised estimate of total revenues, as determined by the November Revenue Estimating Conference. Detailed preliminary budget recommendations will then be developed for each program and agency. The key elements considered as part of the development of these recommendations include the consensus revenue forecast, program plans and performance measures, adherence to policy guidelines, information contained in the agency budget submissions together with agency explanations of the differences in service, and information derived from discussions with agencies.

RIGL 35-3-7 requires the submission of both the Supplemental Budget and the new-year Budget by the Third Thursday in January, or on the First Thursday in February in the year a new Governor is elected. This year’s date falls on January 16, 2020 for the FY 2021 budget.

The Budget Office is continuing a tiered submission schedule for this year’s agency budget requests. Agencies with total FY 2020 enacted budgets of less than $10.0 million (all funds) are required to submit budget requests no later than Friday, September 13, 2019. Agencies with total FY 2020 enacted budgets more than $10.0 million (all funds) are required to submit their budget requests no later than Friday, September 20, 2019. Adherence to these submission dates is expected.

### Timetable/Due Dates

The following table provides the due dates for various deliverables and the projected timelines for decision points during the FY 2021 budget cycle. Intermediate due dates for specific items are further described within these instructions. Any questions concerning what is required as of a specified date should be addressed to the Budget Analyst assigned to your agency.

and the Governor’s Office to review budget recommendations

January 16  Statutory Date for Governor’s Budget Submission to the General Assembly

<table>
<thead>
<tr>
<th>Program Planning</th>
</tr>
</thead>
</table>

Program Planning should be the basis for budget requests. The budget request should
represent a translation of program plans into funding requests. The request should define
the funding needed to carry out program activities and achieve the program’s established
mission and objectives. Program plans provide a major source of background information
to the Governor, the Office of Management and Budget, the Governor’s Policy staff and
the Legislature when budget requests are evaluated.

Each agency has at least one or more missions and objectives that are generally found in
the General Law statutes that created the agency or assigned a responsibility to the agency.

Changes to Program Structure
Agencies and departments are encouraged to review their program structures periodically.
Program structures should be revised when evidence indicates that a revision will improve
agency operations, budgeting, reporting, transparency to the public, or management.
Program structures should be reviewed and adjusted to align with enacted legislative
changes.

In developing or revising a program structure, the following rules should be followed:

1. Programs should serve a single purpose or set of objectives
2. Sub-Programs should be delineated when doing so will improve accountability,
budgeting, fiscal reporting or management.
3. Accounts (line sequences) are **not** programs or subprograms. Accounts are
accounting devices used to reflect fund sources, cost centers, activities, etc.
Accounts should be used to display the funding which comprises a program or
sub-program, therefore, funding within one account should not be shared by
more than one program. Note: one account may in some instances comprise one
program or subprogram.

Agencies or departments may initiate a change in program structure. The
OMB/Budget Office must approve all changes before they are incorporated into the
budget or the accounting system. An agency proposal to change the program structure
should be submitted in writing and should include the following:

1. Copies of the current and proposed program structure in the form of organizational
charts.
2. An explanation of why the change is being requested. What problems have been encountered using the current structure, and/or what improvements will be gained from the new structure?

The creation of new subprograms or the deletion of existing subprograms within an existing program is considered a change in program structure, and therefore, should be approved by the Budget Office.

Written proposals concerning program structure changes must be submitted to the Budget Office by **August 16**. Agencies will be notified of the OMB/Budget Office’s decision within two weeks of the date that the request is received. Therefore, the earlier the request is submitted, the sooner the agency will be informed of the OMB/Budget Office’s decision. Upon approval of a program structure change, the OMB/Budget Office will work with the agency staff to update the budget database to conform to the new structure.

### Budget Request Preparation

Agency budget requests must adhere to the format as described below and will only be considered complete if all required documentation and backup is provided. Some agencies may not require each section as described, but the basic format and order of presentation should be followed in the preparation of your budget request. The general order of presentation is:

- Letter of Transmittal *
- Table of Contents
- Agency Summary Information/Overview (BFM Reports 403 and 103)
- Agency Strategic Plan *
- Department/Agency Budget Tracking Sheets (Reports 150 and 160)
- Revenue Estimates (Report 170N)
- Program Information – FY 2021 Budget
  - Program Narrative (Report 402)
  - Program Summary Financial Data (Report 123)
  - Budget Impact Statements (Report 120)
  - Decision Packages (Report 105)
  - Purchased Services and Contract Employee Data (Report 106)
  - Natural Account Backup Information (Report 151)
  - Federal/Restricted Account Estimates (Report 107)
  - Performance Measures (Report 401)
- Federal Award Summary

*created outside of BFM (add as attachment using Form 5400 or 5410)

Each of these sections and the specific items that should be provided within each section, are described in more detail below. The order and format of the budget submission is shown in more detail in the *Technical Instructions* section of these instructions.
**Letter of Transmittal**
A letter of transmittal from the head of the agency or department must accompany the budget submission. This letter should provide a brief overview of the budget request from the Director’s perspective. How does this budget meet the strategic plan, goals, objectives and policies of the department or agency? What major issues are of concern to the Director, and how are they addressed within the budget proposal? **The letter should be addressed to the Governor.** In addition to the printed submission, please attach this letter to Form 5400 – Agency Submission Attachments (under the Budget Formulation tab).

**Agency Summary Information**
This report provides a summary of the financial data for the entire agency or department. The information required for each fiscal year is:
1. Totals for each program within the agency.
2. Totals for each category of expenditure.
3. Totals for each source of funds.
4. Total number of FTE positions funded in the agency.

A general narrative overview of the Department or Agency should be provided as a starting point. Summary financial data displayed on the Agency Summary form is also required in this section. The Agency Narrative page used in the Annual Budget document should be updated as needed in BFM and used as the narrative overview page in this section. The following information should be provided:

1. **Agency Description** - A general description of the agency, its organization, programs and overall objectives should be provided. This section should provide the reader with an understanding of the agency’s operations, why the agency exists, what services it provides, etc. (This information is entered in the BFM Strategic Planning form and report 403 – Agency Descriptions can be printed for submission)

2. **Agency Expenditure Summary** - The BFM report 103 - Agency Summary Report - BR-1 should be printed to show the total expenditures by source of funds, program, and major category of expense as requested for the budget year, the enacted and revised data for the current fiscal year, and the actual expenditures for the two prior fiscal years.

3. **Strategic Plan** – Agencies should include a copy of its most recent strategic plan in your printed submission and attach the plan in the BFM database using the “Agency Submission Attachment” Form 5400, under Budget Formulation.

**FY 2020 Expenditure Plan Adjustments/Supplemental Request**
As part of the submission of the FY 2021 Budget Request, agencies are required to update their current year (FY 2020) expenditure plans to better reflect the most current and realistic estimate of expected costs. Any changes to appropriations, increases to federal or restricted
authorizations, and approved general revenue reappropriations from FY 2019 must be included in the revised budget request. Agency general revenue budget requests should not exceed the total enacted appropriation by line item, nor should agencies request changes to FTE authorizations in the current fiscal year. Although some increases in general revenue appropriations may be needed due to unforeseen circumstances, it is expected that very few such requests will be submitted as part of the FY 2020 Supplemental Appropriations act in January.

Section 2 of Article 1 of the FY 2020 Appropriations Act establishes that “each line appearing in section 1 of this article shall constitute an appropriation.” This language strictly limits expenditures to the appropriation in each line item. Departments and agencies are not permitted to use funds in one line item to offset costs attributable to another line item without approval through the supplemental budget process. Any reallocation of funds between line items must be requested as part of the FY 2020 Revised Budget and approved by the Legislature in the Supplemental Appropriations Act. As stated above, the Budget Office expects to submit very few such revisions for the current fiscal year.

Agencies must print reports 150 and 160 which are the BFM version of the agency tracking sheets. Accompanying these reports will be any impact statements and decision packages that are created. Minor changes between accounts which are being done to better reflect where expenditures are going to occur, but have no significant effect on program operations, do not require a decision package. However, if funding adjustments will alter a program’s current operations, a decision package must be completed. Any major supplemental funding requests must also be accompanied with a decision package. Information on restricted receipt and other fund sources should be shown separately by running report 107.

Revenue Estimates
Agencies responsible for collecting general revenue departmental receipts (e.g. license fees, fines and penalties, etc.) must provide estimates of these revenues for both the current fiscal year and the budget year. All estimates should be based on current law and should not include any proposed changes to fee structures that may have an impact on revenues. If an agency believes current fee structures require review for potential adjustments, a separate analysis should be prepared and submitted with the budget request.

In addition to implementing program reductions to achieve the constrained budget target funding level, increases to departmental revenues may be proposed for consideration. Any such revenue options should be submitted to the Budget Office for consideration as part of the Agency budget request. All options will be reviewed primarily to determine their viability. If determined to be acceptable, the Budget Office will make any adjustments to the budget recommendations requested by the Governor.

Report 170N should be used to provide the estimates for each existing receipt account. Historical receipt data and the adopted estimates for the current fiscal year will be available to each agency in BFM. Agencies are to include revised estimates for FY 2020 and first estimates for FY 2021. It is critical that this information be based upon current law and
should not include any estimated revenue enhancements. This information will be used to prepare for the November Revenue Estimating Conference and thus must be submitted by September 20.

**Program/Subprogram Information**

Narrative information is intended to provide program information and to explain budget requests. It consists of both program plans and budget specific impacts. The information requested under “Program Plans” below may be updated in BFM’s Strategic Planning form and provided by printing report **402 – Agency and Program Descriptions**. Summary financial data is provided by printing report **123 - Program Summary BR-4**. The principal components of this section of the budget request document are:

- Program Plans
  - Program Title
  - Program Descriptions
  - Program Mission
  - Statutory History
- Program/Subprogram Summary Financial Data (Report 123)
- Budget Impact Statements for the respective program (Report 120)

**Program Plans**

The Program Plan provides, in a narrative format, a general overview of the program, its history, purpose, etc. The plan is intended to provide the reader with an understanding of why the program exists, what its public purpose is, why funding is and/or should be provided. In BFM, report **402 – Agency and Program Descriptions** should be run. This report will identify the Program Mission, Program Description and the Statutory History of the program. Please review these narratives and make appropriate changes in BFM (refer to section 15 in the BFM instructions)

**Program Summary Financial Data**

Each program submission should contain a Program Summary report from BFM report **123 - Program Summary BR-4**. This report aggregates the line item sequence and natural account data by major category of expenditure (personnel, operating, etc.) and funding source (general revenue, federal, etc.).

**Natural Account Code Detail/Backup Information**

*Agencies should not submit expenditure code detail pages for each account. This data will be available to the Budget Office and Legislative Fiscal Office staffs from the budget database.*

Some natural codes by their nature or by the level of funding requested often require additional explanation. These justifications will be entered in BFM as you are updating your budget. Once all justifications are entered you should run report **151 – Natural Account Detail with Justification**, which lists all justifications for changes made to any line sequence in the budget. All consultant/contracted professional services natural
63000’s should have backup detail. A template will be provided to track contract detail. If you have any additional questions about the proper way to complete the template, or the information required, please contact your assigned Budget Analyst. Send the completed template to your Budget Analyst who will ensure the data is uploaded into BFM.

The data will be available using report 106 - Contracts Detail. Note: If a natural account is increasing or decreasing by more than 20 percent from the enacted FY 2020 budget, or if a particular natural account has a significant amount of funding in comparison to others within the same account, some explanation would probably benefit the reader of the budget request. “Major changes” or “significant funding” are relative terms, which are dependent upon the size of the total budget and the budget for a given account. Agencies should use their best judgment to determine if a natural account warrants further justification within BFM. One rule of thumb: you can never provide too much backup information.

Federal/Restricted Account Estimates
Restricted receipt appropriations and federal funds are appropriated at the program level. This provides flexibility when there is more than one restricted and/or federal grant account per program. If needed, the budget ceiling (but not cash resources) from one account could be shifted to another account within the same program (line item) without the need to request an overall cap increase.

To avoid the need for multiple requests for cap increases to federal and/or restricted receipt accounts during the fiscal year, agencies are asked to provide a detailed explanation as to how funding estimates have been determined. You will also utilize the 9270 form referenced in section 14 of the BFM instructions. For restricted receipt accounts, the 9270 form should also be used.

Agencies should carefully develop realistic estimates of funding for all federal and restricted receipt accounts. Using historical data, plus known carry forward amounts, and estimated new grants or receipts, agencies should be able to develop relatively accurate estimates of resources for both the revised budget and the new year budget.

Centralized Services
The FY 2019 Enacted Budget transferred funding from the Department of Administration to respective agency budgets as part of the reestablishment of internal service funds for certain centralized services, including Information Technology (IT), Human Resources (HR), and Facilities Management (FM). The reason behind this move was to eliminate the use of “mirror accounts” in DOA that required agencies to monitor multiple accounts outside of its own agency to get a true picture of total spending. These funds were held harmless in the FY 2021 target development and as such a reduction in total funding for these services should not be used to achieve your savings target. Agencies are encouraged to identify non-general revenue sources that can be used to support HR, IT or FM services and can use such shifts towards the savings target, as long as total funding for these services across the agency remains at least at the enacted level.
Performance Measures
As part of the FY 2021 budget process, the Office of Management and Budget continues the use of performance measures and data in budget development. Performance measures provide greater transparency and accountability of government operations and allow Rhode Islanders to understand how their tax dollars are being used.

Performance measures included in the budget are meant to be a summary of strategic plans and performance management measures. The Budget Office will work with each agency on refining strategic priorities, setting measures and assigning targets. The measures reported in the budget should match those developed through strategic planning and performance management.

All prior performance measures have been loaded into BFM and can be reviewed by running report 401 - Performance Measures - Budget Book View in BFM reporting. In addition, any updates or new measures can be entered by referring to section 15 in the BFM Instructions using the Performance Measures – Agency Form 9260 or Performance Measures – Program Form 9460.

Where required, departments and agencies are to provide performance measures for each budget program. As a reminder, good measures should demonstrate program efficiency, effectiveness and/or improvement of outcomes, not simply count activities. Additionally, they should be:

- Aligned with the department or agency’s strategic plan and/or be consistent with the main purpose of the program;
- Within the control of the department to influence, within some degree; and
- Easily understood by the public.

In FY 2021, performance measure information and data will be collected in BFM so performance information may be printed in the budget document and be accessible on the state’s transparency portal. The following information is requested for each measure and is built into BFM:

- Agency Code & Name
- Program Code & Name
- Measure Name – A short title for the performance measure
- Measure Description – A brief description of measure and its value to the public
- Frequency of Measure – How frequently data are collected (e.g., annually, semi-annually, quarterly, monthly)
- Reporting Period – The time period used to define goals and evaluate attainment (e.g., state fiscal year, federal fiscal year, calendar year)
- Performance Targets and Data – Actual performance data for FY 2019, or partial-year actual performance data for CY 2019 or FFY 2019 with a note in the measure description indicating the data the data is current through; and the annual target for 2021. Do not submit partial-year actual performance data for FY 2020. Do not
revise an existing 2020 target unless there has been a significant change in the program; note any revisions to 2020 targets in the measure description. If data are not available, please leave fields blank and include a note in the measure description.

- NOTE: Performance data must be numeric and cannot contain text.
- REMINDER: FY 2020 and FY 2021 targets should be ambitious, but realistic.

### Technical Instructions

#### Salaries and Benefits

The Budget Office has loaded employee records, benefits, and payroll allocations from various HR and payroll files. The BFM Projection engine projects salary and benefits costs based on these valid Employee records. The Funding Dates on the employee records determine when the Employee’s projection begins. The salary amount is determined by the Salary Table and Step/Grade entered for the employee or the Salary Override Amount. The Step Duration in conjunction with the Step Increase Date determines when the employee gets a step increase/pay raise. Benefit codes have been established with appropriate rates and calculation frequencies to determine benefit costs.

The agency will be responsible for making the appropriate salary, benefit, and allocation updates ensuring the employee records are accurate. Vacant position/employee records identified by the agencies were also added and can also be updated as needed. A Turnover Expectancy record has also been loaded for each Line Sequence that has salary costs. Agencies can update the salary amounts of these records to project negative salary and benefit costs for calculating vacancy factor credits. Projections will be run on an hourly basis throughout the budget process to update the salary and benefit costs and FTE counts.

#### Personnel Supplement Data

Personnel expenditures constitute a significant portion of program expenditures in most agencies. Sound budgeting practice dictates that personnel expenditures receive additional attention. Section 35-3-7 (a) of the R.I. General Laws requires the Governor to submit “a personnel supplement detailing the number and titles of positions of each agency and the estimates of personnel costs for the next fiscal year.”

The Personnel Cost Forecasting (PCF) data within BFM uses the fringe benefit rates as shown in the FY 2021 Planning Values (Table 1). Fringe and related benefits for any new positions or vacant positions not shown in the system will be computed using the rates built into PCF, including using the weighted average for health care benefits for vacant positions.

Agencies should determine turnover expectancy, where appropriate and apply the value to each line sequence effected by entering that amount. Refer to section 16.3 in the BFM
instructions. By entering this amount all benefit calculations will be completed by PCF. There are two kinds of turnover expectancy. The first is the normal savings which occur from employees leaving state service and new employees being hired, usually after a modest delay and at a lower cost than the departing employee. The second kind of turnover expectancy is managed turnover where the department, by design, leaves positions vacant to achieve a certain level of savings. **Note: increasing turnover savings to unrealistic levels is not an acceptable reduction to meet target funding levels. Specific personnel/program reductions should be proposed to achieve savings.**

Agencies should adhere to the following guidelines regarding salaries and wages, and FTE counts.

1. Count each authorized full-time equivalent position as one position notwithstanding the period within a fiscal year that the position is expected to be filled. For example, a full-time position filled for six months of a fiscal year should still be shown as 1.0 FTE, not .5 FTE. **Salaries for such a position should be shown at the full annual cost, and any savings resulting from the vacancy period should be taken as turnover.**

2. Positions should be reflected under the program they are assigned to (i.e. the program where their parent payroll account resides), regardless of whether a portion of their costs are allocated to other programs. In rare circumstances, a position may be cost allocated to another agency. In these situations, you can allocate the position to the other agency and BFM will allocate the personnel costs. **Please be certain that the agency receiving the costs is fully aware of the incoming charge.**

3. **Savings and FTE reductions resulting from program reductions or eliminations should be included in a decision package.** However, program reductions that were included in the enacted budget may not be shown in this way for the current fiscal year, since it is expected that any such reductions would be implemented or in process by this time, and therefore specific positions should already have been identified for elimination (where applicable). Where layoffs are proposed, unemployment costs should be budgeted in expenditure classification 626200 in accordance with the Rhode Island Department of Labor and Training Unemployment Insurance “Quick Reference” Table, click [here](#) to view these instructions.

**Revenue Data**
The Budget Office will upload data to BFM for the general revenue receipt accounts for which the agency is responsible. For each receipt account, the following information will be available:

<table>
<thead>
<tr>
<th>FY 2016 Actual Receipts</th>
<th>FY 2018 Actual Receipts</th>
<th>FY 2020 Enacted Revenue Estimates</th>
</tr>
</thead>
<tbody>
<tr>
<td>FY 2017 Actual Receipts</td>
<td>FY 2019 Actual Receipts</td>
<td></td>
</tr>
</tbody>
</table>
The receipt information will be made available in BFM once final receipts and accruals for FY 2019 are recorded.

The agency will be responsible for providing a revised estimate of revenues for FY 2020 and an initial estimate for FY 2021. These estimates should be based upon current law and should not include any estimated revenue enhancements.

**Form Explanations/Descriptions**

Following are brief descriptions of each form used in the development of your budget submission. Most forms are now provided directly in BFM. If you have any additional questions about the proper way to complete a form, or the information required, please contact your assigned Budget Analyst.

List of Reports Required for Submission

✔ Letter of Transmittal

✔ Agency Summary Information/Overview – Report 403

✔ Agency Summary Report 103 - Agency Summary Report - BR-1
This report provides a summary of the financial data for the entire agency or department. The information required for each fiscal year is:
  5. Totals for each program within the agency.
  6. Totals for each category of expenditure.
  7. Totals for each source of funds.
  8. Total number of FTE positions funded in the agency.

✔ Agency Strategic Plan

✔ Budget Tracking Sheets Report 150/160
The purpose of this report is to give agencies a way of more clearly delineate the changes requested in their budget. This report should be printed by each agency and submitted with their budget request. One report will be completed for the FY 2020-revised budget and one for the FY 2021 budget.

✔ Revenue Estimates (Report 170N)

✔ Program Narrative (Report 402)

✔ BR-4 – Program Summary (report 123)
This report provides a summary of the financial data for an individual program. The information required for each fiscal year is:
  1. Totals for each subprogram within the program.
  2. Totals for each category of expenditure with the program.
  3. Totals for each source of funds.
  4. Total number of FTE positions funded within the program.

✔ Budget Impact Statements for Programs (Report 120)

✔ Purchased Services and Contract and Employee Data (Report 106)
A template will be provided to track contract detail. The template will be uploaded into BFM. The data will be available using report 106 - Contracts Detail.

✔ Natural Account Detail
Report 151 – Natural Account Detail with Justification - This report provides the lowest level of detail by natural account. No need to print and/or submit.

✔ Budget Impact Statements/Decision Packages
In BFM, Decision Packages are entered under the Budget Formulation tab (9230 or 9430); Impact Statements are under the same tab (Form 9420). To
print out these forms, go to BFM reporting and run either report 105 for new year decision packages or report 105R for current year revised decision packages. Report 120 is used for program impact statements.

The purpose of the Decision Packages and Impact Statements is to describe individual changes to the agency budgets. These documents form the basis for not only the Budget Office’s review of the agency budget, but also that of the House and Senate Fiscal Staffs. As such, it is to the agency’s benefit to provide as thorough and detailed an explanation of proposed changes as possible.

Decision Packages are the primary method of entering changes to the agency budget, particularly for constrained budget proposals. The Impact Statement form is for the agency to provide explanation of other changes to the budget that are not appropriate for a decision package, such as the movement of funds between programs or between categories where an explanation would be useful.

Section 14 of the BFM instructions explains how to enter information/data into the Decision Package form.

The Impact Statement (form 9420) is created in a similar manner but does not have the same requirements as the Decision Package. In BFM, a blank impact statement has been created for each agency program. If a new impact statement is needed, select Add New, select a Stage (most likely Agency Stage 1); select your agency/program by using the magnifying glass; and enter a name/description for the impact statement; then save. Once saved, the impact statement tabs for Budget, Narrative and Attachments will be available. Agencies should use the Narrative Tab to enter the following:

1. Timetable – If an option is accepted by the Governor, how long will it take to implement? Also, explain what tasks will be required to implement this option in the stated timeframe.
2. Item Description – This is the section where the agency should provide a detailed description of the funding change being requested, what impact it will have on the agency, etc.
3. Problem(s)/Issue(s) Being Addressed – the request should identify the issues, why they constitute a problem, and why it is appropriate at the current time to address the problem.
4. Anticipated Outcome/Impact after Implementation of Changes – Discuss how the option will address the identified problem and the expected result. Use quantified statements as necessary.
5. Relationship to Agency mission, goals and agency key indicators - Discuss how any expansion request relates to the agency’s mission and goals and how it will influence key performance indicators. Identify connections to the agency’s strategic plan as necessary. This section should also describe how the request relates to the Governor’s agenda.
6. Interagency Impact – Describe any anticipated impact the requested change in your agency budget may have on other agencies in state government. For example, an
agency proposes to close a residential center, the clients could spill over into another agencies’ caseload.

7. Information Technology Needs – If the option includes an information technology change this section should provide an overview of the change. Any estimates regarding cost components and timeframes should be provided. These include IT projects or projects where there is an IT component, regardless of funding source. IT is the application of computers and telecommunications equipment to store, retrieve, transmit and manipulate data.

The Published Summary and Governor’s Summary fields do not need to be filled in by the Agency.

- **Restricted Account Estimates (Report 107)**
- **Performance Measures (Report 401)**
- **Federal Award Summary – provided by the Office of Grants Management (if applicable)**

<table>
<thead>
<tr>
<th>Legislation passed in the 2013 session of the General Assembly requires the Office of Management and Budget to compile an inventory of all reports filed by executive branch agencies with the General Assembly. The inventory is to include the following information:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. type of report</td>
</tr>
<tr>
<td>2. the title of the report</td>
</tr>
<tr>
<td>3. the authors of the report (who prepares it)</td>
</tr>
<tr>
<td>4. the specific audience of the report</td>
</tr>
<tr>
<td>5. a schedule of the reports’ release (when it is published).</td>
</tr>
</tbody>
</table>

As part of this year’s budget request submission, each agency is requested to update the list of any reports provided with last year’s budget submission. The Office of Management and Budget will distribute the report filed by your agency (if applicable) last year to be updated.

### Planning Values

Listed on Table 1 are the planning values loaded into BFM for various budget object codes that will be used by the system in PCF.

The FY 2021 budget will be prepared in a manner consistent with the Office of Management and Budget (OMB) Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards (2 CFR 200) that identifies the principles for allowable costs for federal programs. There will be an **assessed fringe benefit** that will include several components to capture charges through a cost allocation system. OMB A-87 stipulates that payments for unused leave, unemployment and worker’s compensation for current or former employees be allocated as a general administrative expense to all activities of the government unit. Therefore, individual agencies will not be charged for
the actual costs attributable to their employees for unused leave, worker’s compensation, or unemployment, but rather charged a statewide benefit assessment that is charged as a percentage of payroll. Funds for worker’s compensation or unemployment should not be budgeted separately; they will be funded from the statewide benefit assessment. Note: unemployment compensation costs should be included in your FY 2021 budget request if you are proposing a reduction in staffing that will result in layoffs.

Also, section 28-31-8 of the Rhode Island General Laws requires that the state pay a share of the assessment levied by the Department of Labor and Training for the Worker’s Compensation Administrative Fund. This assessment is used to fund services provided by the Donley Center, the Worker’s Compensation Court, and to fund certain administrative costs relating to Workers’ Compensation. This charge became effective with the fiscal year 2000 budget year and, consistent with OMB A-87, will also be a general administrative expense.

If you have any questions about any of these planning values or need additional information about an object code not listed, please contact your assigned Budget Analyst for assistance.

### FTE Cap

Article 1, Section 11 of the FY 2020 Appropriations Act establishes the FTE caps for each agency in state government which total **15,074.7** Full Time Equivalent positions statewide. Click [here](#) to view the FTE chart that reflects the allocation of FTE by agency.

Article 1, Section 11 of the FY 2020 Appropriations Act also defines the procedure for obtaining an adjustment to a full-time equivalent authorization level. Like the procedure for obtaining increases in federal and restricted receipt account appropriations, any adjustments to FTE authorizations must be approved, at the recommendation of the State Budget Office, by the Governor, the Speaker of the House and the Senate President.

Agencies or departments that require an increase to their current FTE authorization limit, as established in the FY 2020 Appropriations Act, should include such a request in their FY 2020 Revised Budget request. Within each program where additional FTE positions are being requested, the following questions should be answered.

- What is the critical need for the position(s)?
- What will the position(s) be doing?
- Why can’t present staff perform the function(s)?
- If additional FTE’s are not provided, how will the program be impacted?

If an increase to the current FTE authorization is required after the submission of the budget, agencies may submit a separate request, at any time during the fiscal year, which provides the same information as requested above. This request should be addressed to the Budget Officer. If approved, the appropriate paperwork will be submitted to the Governor, the Speaker of the House, and the Senate President for their signature.
